# UNRWA SITUATION REPORT #183 ON THE HUMANITARIAN CRISIS IN THE GAZA STRIP AND THE WEST BANK, INCLUDING EAST JERUSALEM

Friday, August 8, 2025

All information updated for 31 July - 6 August 2025 <sup>[1]</sup>  
Days 662- 668 since the start of the war in the Gaza Strip

## UNRWA response in the Gaza Strip

### Health

Over 9.4 million  
health consultations  
since October 2023

Over 66,000 health  
consultations provided  
between 28 July and  
03 August

4 UNRWA health centres, 2  
temporary health centres and 19  
medical points still operational

### WASH

Around 600,000 people  
reached with 20,000  
cubic metres of  
domestic and potable  
water between 16-30  
July

Around 1,500 tons of solid  
waste collected and  
transferred to temporary  
dumping sites between 16-  
30 July

240 hygiene awareness  
sessions for around  
150,000 people conducted  
between 16-30 July

### Psychosocial Support and learning

Around 730,000 displaced  
people, including over  
520,000 children, reached  
with psychosocial support  
sessions and activities

UNRWA flour and food parcels ran  
out several weeks ago. No UNRWA  
supplies entered the Gaza Strip  
since 2 March 2025

### Protection

Over 12,300 children  
participating in basic literacy  
and numeracy learning

Protection services provided to over  
2,820 GBV survivors and around  
nearly 5,000 children (including over  
2,000 unaccompanied children)

## Highlights

### The Gaza Strip

- During the reporting period, airdrops from several member states have continued, despite warnings from several international bodies that they are very expensive and ineffective.
- UNRWA Commissioner General stated (<https://x.com/UNLazzarini/status/1951225049869947145>) that "Airdrops are at least 100 times more costly than trucks [that] carry twice as much aid as planes. (...) UNRWA, the largest UN agency on the ground, has 6,000 trucks loaded with aid stuck outside Gaza waiting for the green light to enter. The UN including UNRWA [and] partners were able to bring in 500 to 600 trucks a day during the ceasefire earlier this year, [with aid reaching] the entire population of Gaza in safety and dignity."
- WFP Executive Director said (<https://x.com/WFPChief/status/1953200085036405009>) that "We can't airdrop our way out of an unfolding famine. Not in Gaza." where "500,000 people are starving (...). The only way to get food to them, at scale, is by land."
- The Humanitarian Country Team of the occupied Palestinian territory (oPt) issued a statement (<https://www.ochaopt.org/content/un-agencies-and-ngos-warn-without-immediate-action-most-international-ngo-partners-could-be-de-registered>) calling for urgent action to safeguard the humanitarian operations of International NGOs in the oPt, that are currently facing risk of de-registration.
- As reported by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), over the past week, one PRCS (<https://x.com/PalestineRCS/status/1952014301775925571>) staff member was killed at the PRCS headquarters in Khan Younis, when the PRCS Headquarters in the area was hit.
- Since the war began, nearly 350 UNRWA team members have been confirmed killed.
- As of 6 August (<https://www.ochaopt.org/content/reported-impact-snapshot-gaza-strip-6-august-2025>), 86.3 per cent of the Gaza Strip remains within the Israeli-militarized zone, under displacement orders, or where these overlap. As reported by OHCHR, as part of the statement (<https://www.ohchr.org/en/press-releases/2025/08/un-experts-call-immediate-dismantling-gaza-humanitarian-foundation>) by UN experts "nearly 1,400 people have been killed and more than 4,000 injured while seeking food. At least 859 people have been killed around GHF sites since the beginning of GHF's operations in late May 2025."

## United Nations Relief and Works Agency for Palestine Refugees in the Near East

(<https://www.unrwa.org/en>)

DONATE

(<https://donate.unrwa.org/int/en/general>)

The health response in the Gaza Strip continues to face operational challenges, including extensive damage to health facilities, obstacles to movements and restrictions on the entry of medical supplies and equipment. UNRWA medical facilities are under-resourced. The agency has run out of 10 per cent of essential medicines. As an example, UNRWA only has medicines for hypertension, no antibiotics for adults, no antiparasitic products and no iron supplements for children

- UNRWA has not been allowed to bring any humanitarian aid into Gaza, including medicines and medical supplies, for more than five months now (since 2 March 2025).

The occupied West Bank, including East Jerusalem

- Tens of thousands of Palestine Refugees remain forcibly displaced in the northern West Bank. According to the latest UNRWA assessment, some 30,000 residents of Nur Shams, Tulkarm, and Jenin refugee camps are unable to return to their homes as a result of the large-scale Israeli Forces operation 'Iron Wall', ongoing since January 2025.
- Following the killing of a Palestinian community member by an Israeli settler on 28 July, the Bedouin refugee community of Umm al Kheir has remained under heightened Israeli movement restrictions, including the administrative detention of several community members and withholding of the deceased's body at the time of reporting.

## Key points

The Gaza Strip

Fatalities and Injuries

- Israeli Forces continue to carry out heavy bombardments from air, land and sea across the Gaza Strip and expanded ground operations, resulting in tens of thousands of reported casualties, destruction of civilian infrastructure, and large-scale displacement. People are living in inhumane conditions, seeking shelter anywhere they can, including damaged or destroyed buildings, overcrowded displacement sites, and open areas. Strikes on people sheltering in schools and tents, as well as on people trying to access food or other forms of humanitarian assistance keep being reported, resulting in mass casualties, including among children.
- Between 7 October 2023 and 6 August 2025, according to the MoH in Gaza, as stated by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), at least 61,158 Palestinians have been reportedly killed in Gaza and 151,442 have been injured. As reported by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), Gaza MoH recorded that, of the 60,199 identified fatalities as

of 21 July, 27,605 were men, 9,735 women, 18,430 children, and 4,429

United Nations Relief

(<https://www.unrwa.org/en>)

As reported by OCHA,

(<https://palestine-refugees.in-palestine-refugees.in-releases/2025/08/un-experts-call-for-urgent-humanitarian-response-in-gaza>)

DONATE

the near east

(<https://donate.unrwa.org/int/en/general>)

By the end of July, 1,400 people have been killed and more than 4,000 injured while seeking food. At least 859 people have been killed around GHF sites since the beginning of GHF's operations in late May 2025."

- Since the war began, nearly 350 UNRWA team members have been confirmed killed.

## Food insecurity

- As reported by OCHA (<https://www.ochaopt.org/content/gaza-humanitarian-response-update-20-july-2-august-2025>), food security partners, including UNRWA, have enough food outside of the Gaza Strip to provide food for the entire Gaza population of 2.1 million people for at least three months. Due to existing constraints preventing supplies from entering via land, 14,000 metric tons of food aid procured through the UN-coordinated aid mechanism were collected from crossings in the month of July, while 62,000 metric tons is required each month to cover basic humanitarian food assistance needs. Most of the collected aid was offloaded by hungry crowds or looted by armed gangs before reaching UN warehouses.
- According to the latest reports from Gaza MoH, as noted by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), as of 6 August, 193 malnutrition-related deaths were documented, including 96 children. This includes five people who died in hospitals in the preceding 24 hours. For the month of July, out of 136,000 children between the age of six and 59 months screened, 11,877 children were identified to be suffering from acute malnutrition, the highest monthly figure recorded to date.
- According to WFP July 2025 Market Monitor (<https://docs.wfp.org/api/documents/WFP-0000168133/download/>), the daily and at times hourly fluctuation of wheat flour prices are due to the lack of steady food availability, wheat flour in particular as the key staple, and lack of functionality of the markets. That is why sustained, large-scale deliveries are urgently needed to stabilize essential food items availability, pricing, and affordability.
- With minimal food assistance, people in Gaza, particularly the most vulnerable, keep facing hunger and malnutrition, while having exhausted all coping mechanisms.
- As also stated in the WFP Food Security Analysis (<https://docs.wfp.org/api/documents/WFP-0000168133/download/>), food prices continued to rise sharply, increasing by 25 percent to as much as 9,900 percent compared to ceasefire levels and by 233 percent to 15,285 percent compared to pre-conflict levels.

## Health

The health response in Gaza continues to face severe operational challenges, including extensive damage to health facilities, killing of health workers, obstacles to safe movements within the Gaza Strip, and restrictions on the entry of medical supplies and critical fuel. This is forcing the remaining hospitals to ration resources and/or suspend services.

United Nations Relief and Works Agency for Palestine Refugees in the Near East

(<https://www.unrwa.org/en>)

DONATE

(<https://donate.unrwa.org/int/en/general>)

- UNRWA medical services are critically under-resourced. Over half (or 57 per cent) of essential medical supplies are already out of stock and nearly one fifth (18 per cent) are projected to run out in under two months. The affected supplies include medicine for non-communicable diseases, antimicrobials and antiparasitic products, dermatological and eye preparations, analgesic and anti-inflammatory medications, gastrointestinal products, respiratory medications, and family planning methods.
- Despite existing constraints, UNRWA continues providing medical services at its health facilities in addition to surveillance of communicable diseases. The data collected during the reporting period reflect reporting of acute respiratory illness, diarrhoea among children under five years and jaundice. During the last week, 10,048 cases were detected.
- Since the beginning of May 2025, there has been an increase in reported meningitis cases. A total of 229 cases were reported in May, while in June, a total of 275 cases were reported. A total of 370 cases of meningitis were reported, from 01 to 25 July. Of these cases, a total of 258 (69.7 per cent) cases were viral meningitis and 112 (30.3 per cent) were bacterial. Most cases were reported mainly in Gaza and Khan Younes governorates.

## Displacement, Site management

- Over 87 per cent of the Gaza Strip remains within the Israeli-militarized zone, under displacement orders, or where these overlap, as of 30 July 2025.
- According to the Site Management Cluster (SMC) latest population movement report ([https://reliefweb.int/report/occupied-palestinian-territory/population-movement-monitoring-weekly-update-24?utm\\_source=rw-subscriptions&utm\\_medium=email&utm\\_campaign=country\\_updates\\_180](https://reliefweb.int/report/occupied-palestinian-territory/population-movement-monitoring-weekly-update-24?utm_source=rw-subscriptions&utm_medium=email&utm_campaign=country_updates_180)) 767,800 people have been displaced since the breakdown of the ceasefire, on 18 March 2025. About 80 per cent of newly recorded movements originated from or took place within Khan Younis governorate, according to the report.
- According to the UN, at least **1.9 million people** – or about **90 per cent** of the population – across the Gaza Strip have been displaced during the war. Many have been displaced repeatedly, some 10 times or more. The many displacement orders issued by the Israeli Forces since the collapse of the ceasefire forced more people to flee in search of safety.
- Through its site managers and frontline staff, UNRWA continues monitoring movement of displaced persons, as well as sites of displacement. At the time of writing, over 98,000 forcibly displaced

persons are reportedly registered at UNRWA shelters and the surrounding areas, with UNRWA running over 60 shelters. (<https://www.unrwa.org/en>)

During the period between 30 July and 5 August, one displacement order was issued to the refugee for across the Gaza Strip: on 2 August, a

displacement order impacted areas in east Gaza (rural and Daraj area), the near east (<https://donate.unrwa.org/int/en/general>)

UNRWA installations affected.

- At least 189 UNRWA installations – or over half of all UNRWA installations in the Gaza Strip – are located within the Israeli-militarized zone, under displacement orders, or where these overlap.

## Operational implications and humanitarian response

- As reported by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), while limited quantities of fuel have been entering Gaza over the past week, fuel supplies remain critically limited and unpredictable, significantly undermining the ability of humanitarian partners to deliver and sustain lifesaving services, particularly those related to water provision.
- UNOPS Executive Director stated (<https://www.unops.org/news-and-stories/speeches/statement-on-severe-fuel-shortage-in-gaza>) that “Fuel is a lifeline in Gaza - it runs hospital generators, ambulances, bakeries and water pumps. With no fuel having entered Gaza in more than 17 weeks, these critical operations are now shutting down. [...] Yesterday, we prioritized fuel for the desalination plant over the sewage pumps. This means sewage will flood the streets again in some areas, on top of everything else.
- The latest WASH cluster fuel report ([https://drive.google.com/file/d/10jjqRYRm5HAIASImkI07mJzHboCUI\\_Qx/\](https://drive.google.com/file/d/10jjqRYRm5HAIASImkI07mJzHboCUI_Qx/\)) indicates that in July, WASH partners received approximately 852,000 litres of diesel, meeting only 62 per cent of the 1.36 million litres required to sustain life-saving WASH interventions, and just 41 per cent of the 2.10 million litres needed to maintain all emergency WASH services.
- Limited fuel supplies also remain insufficient to sustain UNRWA operations in the Gaza Strip. While contingency measures have been implemented to maintain UNRWA activities during the reporting period, including but not limited to generators in UNRWA shelters running two hours per day instead of seven to pump water, some UNRWA health centres were forced to operate one shift instead of two, sanitation and water trucking services scaled down, like transportation enabling movement of staff across areas of operation and UNRWA premises,.
- The Humanitarian Country Team of the occupied Palestinian territory (oPt) issued a statement (<https://www.ochaopt.org/content/un-agencies-and-ngos-warn-without-immediate-action-most-international-ngo-partners-could-be-de-registered>) calling for urgent action to safeguard the humanitarian operations of International NGOSs in the oPt, that are currently facing risk of de-registration. Under Israeli authorities’ requirements introduced on 9 March 2025, international NGOs are obliged to share sensitive personal information about their Palestinian employees or face termination of their humanitarian operations across

# United Nations Relief and Works Agency for Palestine Refugees in the Near East

the oPt (the Gaza Strip and the West Bank, including East Jerusalem). statement highlights that unless urgent action is taken, humanitarian nisations warn that most international NGO partners could be de-registered by 9 September or sooner, forcing them to halt their operations in the occupied West Bank, including East Jerusalem. (https://www.unrwa.org/en)

DONATE

(HTTPS://DONATE.UNRWA.ORG/INT/EN/GENERAL)

UNRWA international staff are banned from entering the occupied Palestinian territory. This follows the passage of two laws by Israel's parliament, (the Knesset), on 28 October 2024[2], that prohibit UNRWA's operations in "Israeli territory" and bar any contact between Israeli officials with UNRWA. **The Israeli Authorities have not granted the Agency's international staff visas for more than six months now (end of January 2025).**

- Meanwhile, around 12,000 Palestinian UNRWA personnel in Gaza continue to provide services and assistance to an entire population in need, while leading the collective humanitarian response. In the occupied West Bank including East Jerusalem, UNRWA continues to play a central role with over 4,000 UNRWA Palestinian local staff providing education, health and other services to Palestine Refugees.

*A child receives care at an UNRWA health centre in Deir Al Balah, Central Gaza. As one of the largest providers of primary health care and nutrition services in the Strip among humanitarian partners, UNRWA's role is critical in famine prevention and response. © 2025 UNRWA photo*

The occupied West Bank, including East Jerusalem

According to OCHA (<https://www.ochaopt.org/data/casualties>), between October 2023 and 4 August 2025, 995 Palestinians – among them at least 210 children – were killed in the occupied West Bank, including East Jerusalem. Of those refugees, including at least 37 children, were killed at the beginning of this year alone.

Following the killing of a Palestinian community member by an Israeli settler on 28 July, the Bedouin refugee community of Umm al Kheir has remained under tight Israeli imposed movement restrictions in addition to the administrative detention of some community members and the withholding of the body of the deceased. In response, women from the community have been on hunger strike since 31 July.

- Early on 31 July, Israeli settlers attacked Silwad, north-east of Ramallah, allegedly setting fire to houses and vehicles. Israeli Forces were also present on site, and fired tear gas. One Palestinian died at the scene, bringing the total number of Palestinians killed in the context of settler violence during July 2025 to five.
- On 1 and 2 August, some residents of Jenin Camp were temporarily able to access the camp to retrieve belongings, before the Israeli Forces prevented further entries. Entry to the camp has been near-impossible since January 2025 under the Israeli Forces operation 'Iron Wall', with residents of Jenin Camp remaining forcibly displaced along with residents of Tulkarm and Nur Shams camps in the northern West Bank. UNRWA continues to deliver adapted services in the northern West Bank reaching forcibly displaced communities.
- Early on 4 August, Israeli Forces conducted an operation in the vicinity of Qabatiya in the northern West Bank, exchanging fire with Palestinians and striking a house with an anti-tank grenade, killing two Palestinians.

## Gaza Humanitarian overview and response

Between 7 October 2023 and 06 August 2025, according to the MoH in Gaza as stated by OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>), at least **61,158** Palestinians have reportedly been killed in the Gaza Strip while **151,442** have been reported injured.

# United Nations Relief and Works Agency for Palestine Refugees in the Near East

(<https://www.unrwa.org/en>)

BI%D9%AA%DA%BI-  
%AA%DA%AV-

**Over 767,800**  
people estimated  
to have been  
forcibly displaced  
since 18 March

**Nearly 350**  
UNRWA team  
members **killed**

**311\*** UNRWA  
installations  
impacted and/or  
damaged

**894\*** incidents  
reported

At least **845\*** people  
sheltering in UNRWA  
premises have been killed  
and **2,544\*** injured since 7  
October 2023

*\*Numbers are subject to change once verifications are concluded.*

## Humanitarian access, protection of civilians

- UNRWA is working to verify the details of incidents that reportedly impacted UNRWA premises and/or personnel. Additional information will be provided once it becomes available\*.
- From 30 July to 5 August, several armed-conflict-related incidents have reportedly impacted UNRWA installations and/or personnel:
  - On 2 August, an UNRWA health centre in Khan Younis was reportedly indirectly impacted by the detonation of an explosive-laden robotic device by Israeli Forces in the nearby area. Minor damage to the facility and no casualties among UNRWA personnel were reported.
  - On 2 August, an UNRWA school in Khan Younis was reportedly indirectly impacted by the detonation of an explosive-laden robotic device by Israeli Forces in the nearby area. Minor damage to the facility and no casualties among UNRWA personnel were reported.
  - On 2 August, an UNRWA school in Khan Younis was reportedly struck directly by Israeli Forces tank shelling. Minor damage to the facility and no casualties among UNRWA personnel were reported.
  - On 2 August, an UNRWA facility in Khan Younis was reportedly indirectly affected by Israeli Forces artillery shelling and quadcopter bombings in the nearby areas. Moderate damage to the facility and assets and no casualties among UNRWA personnel were reported.

As of 22 July 2025, **894\*** incidents impacting UNRWA premises and the inside them have been reported since the beginning of the conflict-related incidents since the beginning of the war with some installations impacted multiple times. UNRWA estimates that, in total, at least **845\*** persons sheltering in UNRWA installations have been reported killed and at least **2,544\*** injured since the start of the war. UNRWA continues to verify and update the number of casualties caused by these incidents.

United Nations Relief and Works Agency for Palestine Refugees in the Near East  
(<https://www.unrwa.org/en>)  
**DONATE**  
(<https://donate.unrwa.org/int/en/general>)

*\*Since the start of the war in October 2023, the latest casualty figures are continuously under review as UNRWA gains access to locations that were previously inaccessible and as further verifications occur. The summary figures will be published/updated as information becomes available, noting that these numbers are subject to change once verifications are concluded.*

- OCHA (<https://www.ochaopt.org/content/humanitarian-situation-update-311-gaza-strip>) reported that of the 72 planned aid movements coordinated with Israeli authorities across Gaza between 30 July and 5 August 2025, three per cent were denied, 5 per cent withdrawn. More than half of movements were facilitated (37 or 51 per cent). Twenty-eight (28) mission were impeded (39 per cent) due to entailing extensive delays, including at the ad-hoc checkpoint that has been set up by Israeli forces along the Morag route on 29 July where missions have experienced delays of more than two hours.

## The Gaza Strip

### Health and Nutrition

- Since 18 March (when the ceasefire collapsed) and until 27 July, UNRWA health teams provided over 1.5 million health consultations (or over 14,000 per working day), including nearly 107,000 maternal consultations including antenatal, post-natal and family planning care, over 56,000 dental and oral health consultations in fixed and mobile clinics, and over 37,500 physiotherapy rehabilitation services sessions. Between 7 October 2023 and 27 July 2025, UNRWA provided over 9.44 million medical consultations across the Gaza Strip.
- In addition to medical consultations, UNRWA (in partnership with and supported by other UN agencies, including UNICEF and WHO) continued to vaccinate children. Over 300,000 routine vaccines have been given to children since January 2024.
- To date, only four out of 22 UNRWA health centres and two additional UNRWA-rented facilities used as temporary health centres were operational in Gaza. In addition, health services are provided through 108 mobile medical teams working in 21 medical points inside and outside shelters in the Middle Area, Khan Younis, Al Mawasi, Gaza City.

UNRWA health facilities provide primary health care, including outpatient services, non-communicable disease care, medications, vaccination for children, antenatal and postnatal health care, laboratory and dental services, and first aid and psychosocial support. The number of health facilities changes constantly based on demand, access and security.

United Nations Relief and Works Agency for Palestine Refugees in the Near East

(<https://www.unrwa.org/en>)

DONATE

(<https://donate.unrwa.org/int/en/general>)

- Between 28 July and 3 August, an average of over 1,141 UNRWA health personnel per day worked in UNRWA health centres, temporary clinics and medical points across the Gaza Strip, providing 66,357 health consultations (or around 11,000 per working day).
- Between 28 July and 3 August, UNRWA medical teams provided 5,263 consultations for post-natal and pregnant women at high risk, 2,836 dental and oral health consultations in fixed and mobile clinics, and 1,932 physiotherapy rehabilitation services sessions in health centres and medical points. A total of 3,757 lab tests were conducted in UNRWA health centres and medical points.
- Overall, since January 2024, more than 240,000 children under the age of five have been screened for malnutrition in UNRWA health facilities and medical points. One in 10 children were malnourished.

## Mental Health and Psychosocial Support

- UNRWA remains one of the largest providers of emergency learning and PSS services across the Gaza Strip. With the support of 236 school counsellors and over 300 assistant counsellors, the Agency has conducted 316,878 critical PSS sessions for approximately 730,000 displaced persons, including more than 520,000 children. Between 21 Jul to 27 Jul 2025 a total of 6,171 IDPs accessed these essential services.
- Between 7 October 2023 and 4 August 2025, UNRWA's social work team provided services to 231,567 displaced persons, including psychological first aid, PSS services, family and individual activities, as well as case management. During the same reporting period, protection services were provided to 2,827 survivors of gender-based violence (GBV) and 4,935 children, including 2,177 unaccompanied children. The team also supported 26,701 persons with disabilities with PSS; 5,000 of these individuals received assistive devices and rehabilitation services. Awareness sessions on GBV, child protection, disability and special needs, as well as managing social and psychological stressors, were conducted for 146,537 displaced persons.
- UNRWA continued to provide mental health and psychosocial support (MHPSS) services in Gaza City, the middle and Khan Younis areas, with health teams of 49 among psychiatrists, psychosocial counsellors and supervisors to assist special cases referred from UNRWA health centres and shelters. Between 28 July and 3 August, UNRWA teams responded to 2,220 cases in health centres and at medical points through individual consultations, psychological first aid, awareness sessions and to address cases of gender-based violence (GBV).

## Learning

UNRWA has been providing learning services in Gaza in Temporary Learning Spaces (TLSs) and through its distance learning initiative.

More than 56,000 children, over 55 per cent of them girls, have benefited from educational activities delivered in 450 TLSs

UNRWA schools-turned shelters. <https://www.unrwa.org/en> [DONATE](https://donate.unrwa.org/int/en/general) [HTTPS://DONATE.UNRWA.ORG/INT/EN/GENERAL](https://donate.unrwa.org/int/en/general)

## Food Security

- Since 7 October 2023 and until the start of the ceasefire (19 January 2025), UNRWA reached over 388,000 families (nearly 1.9 million people) with two rounds of flour; at least 374,000 of those families have received three rounds.
- Up until the start of the ceasefire, UNRWA reached at least 1.7 million people with food parcels. Of those, at least 215,000 people received two rounds of food parcels since the war started. These include[3] rice, lentils, beans, oil, salt, sugar, milk powder, hummus, halawa, yeast, and canned fish, and are designed to meet the needs of a family of five for two weeks.
- In addition to the distribution of UNRWA food parcels, the Agency has distributed food parcels on behalf of other UN organisations, having reached over 1.4 million people before the start of the ceasefire.
- During the ceasefire, UNRWA reached over 2 million people with critical food assistance. UNRWA ran out of flour and food parcels at the end of April and was forced to halt food distributions. Between 1 March and 19 April 2025, UNRWA distributed nearly 270,000 bags of flour, reaching an estimated 88,000 families – or over 700,000 people. Since the ceasefire collapsed and until 8 April, only around 15,500 families (or an estimated 77,500 people) have received UNRWA food parcels. **UNRWA ran out of food at the end of April. The Agency has not been allowed to bring in any humanitarian assistance including food for 5 months now (since 2 March 2025).**

## Water, Sanitation and Hygiene (WASH)

- Since October 2023, UNRWA has carried out emergency WASH activities across the Gaza Strip, at Designated Emergency Shelters and informal settlement areas, supporting around 1.7 million displaced persons. Interventions include operating and maintaining water wells and desalination systems and supplying water with water trucks and bottled water. In addition, UNRWA continues to maintain hygiene in its shelters and sites through cleaning supplies, community-based solid waste management, and pest control.
- In 2025, UNRWA water provision and solid waste collection have reached around 1.4 million people (to date).
- Despite the displacement orders in Khan Younis, UNRWA water well continued to operate producing over 500 cubic meters of water daily and benefiting displaced persons in north Rafah and Khan Younis camps. Until the end of July, UNRWA has reached around 240,000 Displaced Persons with potable water provision, and 1.2 million displaced persons with domestic water.

UNRWA continues to provide solid waste collection and transfer services wherever possible. (https://www.unrwa.org/en)

and works agency for

awareness of refugees in areas across the Gaza Strip, benefiting 150,000 displaced persons, and conducted 95 cleaning campaigns inside the near east (https://donate.unrwa.org/int/en/general)

benefiting over 90,000 displaced persons.

**Quote** (https://x.com/UNRWA/status/1950850328158404871) **from Majdiya, an UNRWA colleague in Gaza:**

**“Look at us: our bodies are breaking, the bombs keep falling, we run from one place to another and there is no medicine left. Our children are sick, our mind are tired, but what choice do we have? We still go to the shelters, we still help the displaced, even when the roads are death traps, even when we haven't slept, even when we are just broken as the people were trying to save. But now much longer can we hold on?”**

**Your donatio (https://donate.unrwa.org/-landing-page/en\_EN)ns can help provide emergency humanitarian assistance. (https://donate.unrwa.org/-landing-page/en\_EN)**
